or Cardboard

BrilliantLittleIdeas.com

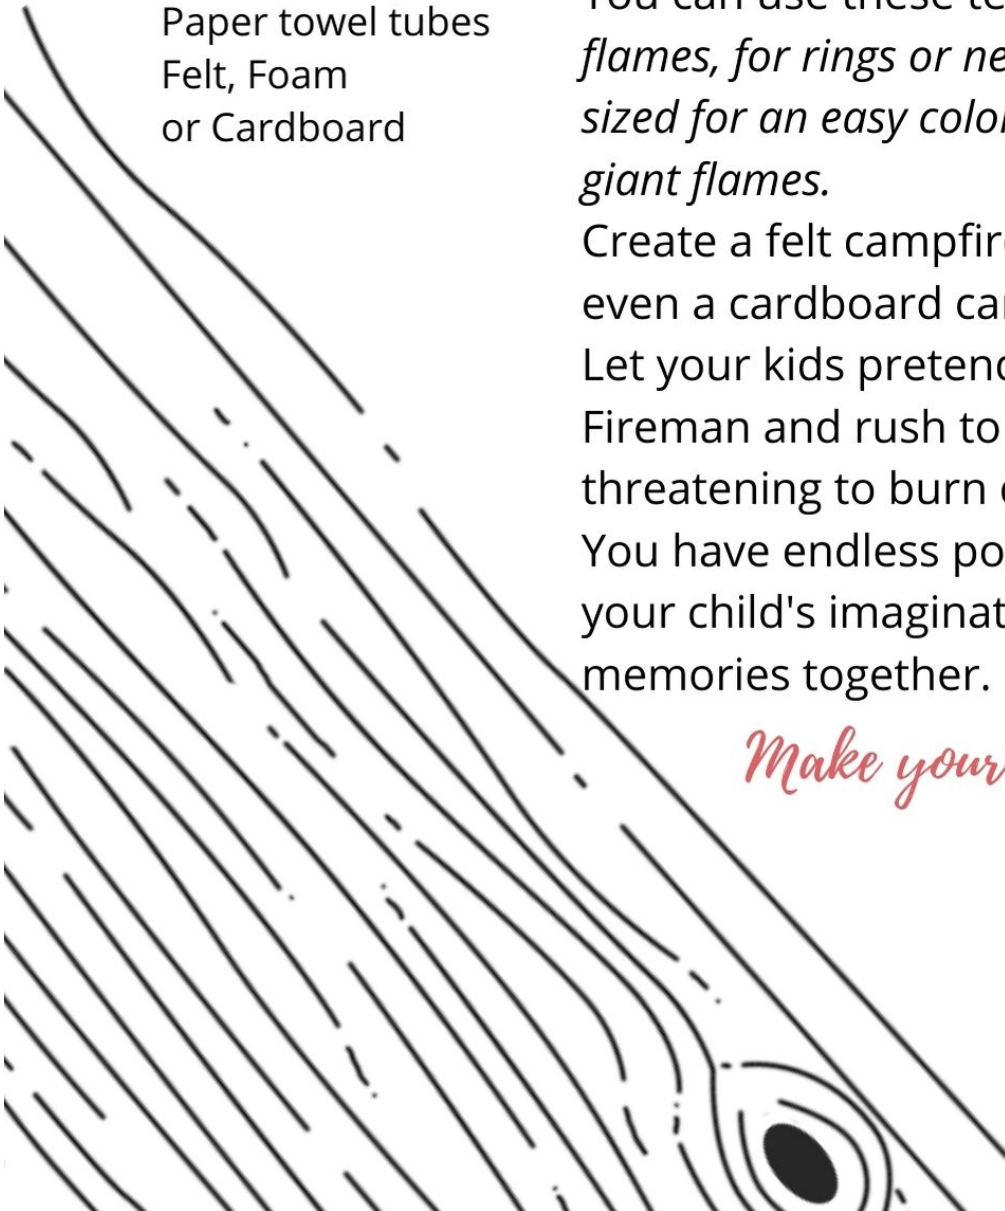

The Possibilities Are Endless

You can use these templates to make *tiny flames*, for rings or necklaces. Regular paper sized for an easy color page for kids or even *giant flames*.

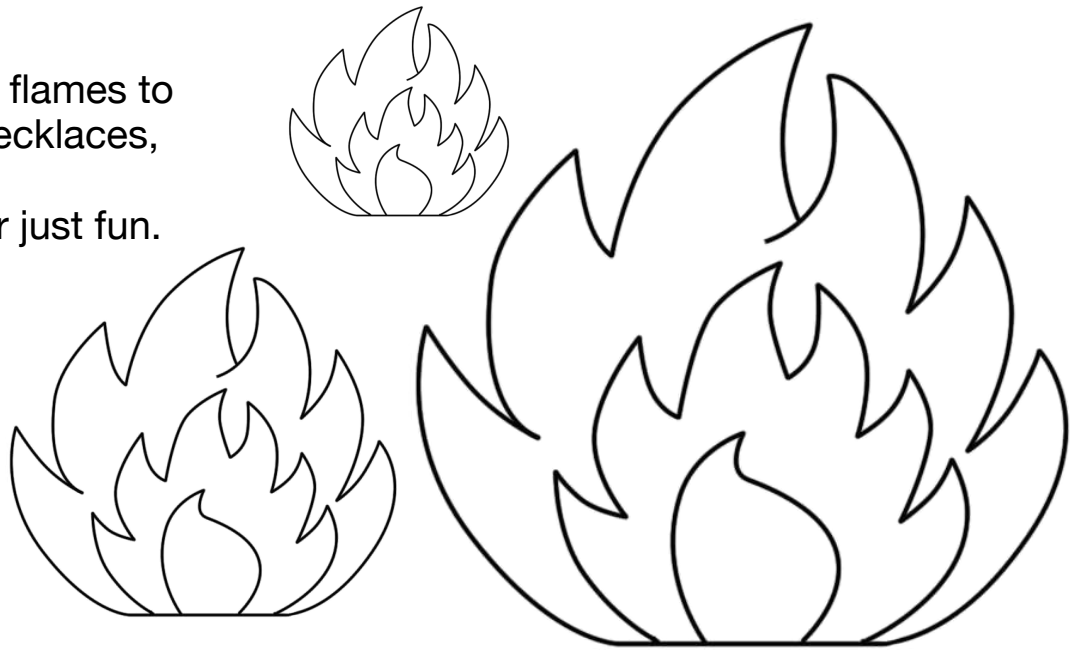

Create a felt campfire, foam, cardstock, or even a cardboard campfire.

Let your kids pretend play that they're a Fireman and rush to put out the fire threatening to burn down their playhouse. You have endless possibilities. Let you and your child's imaginations soar as you make memories together.

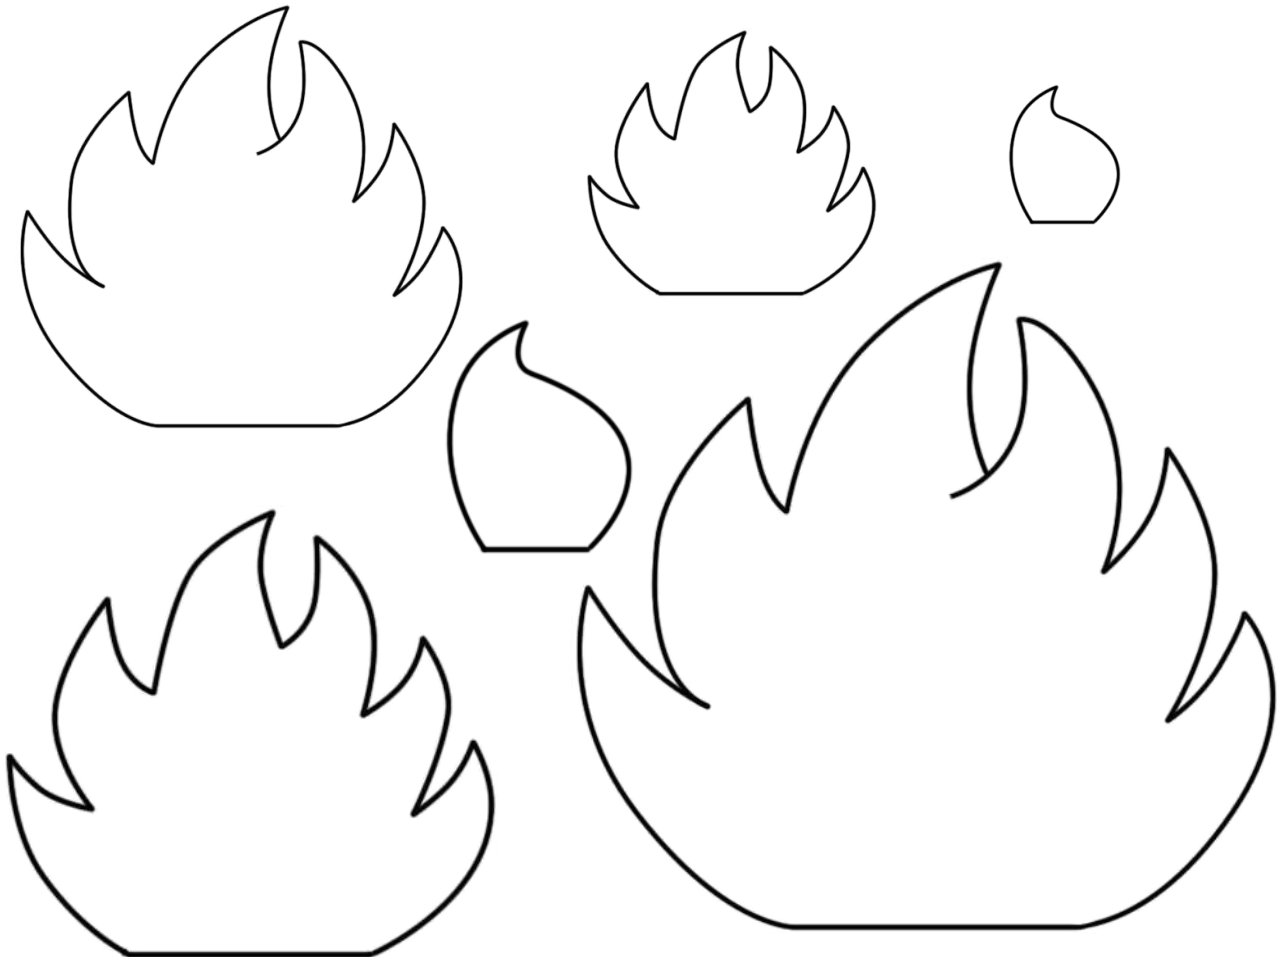

Make your own fake wood too.

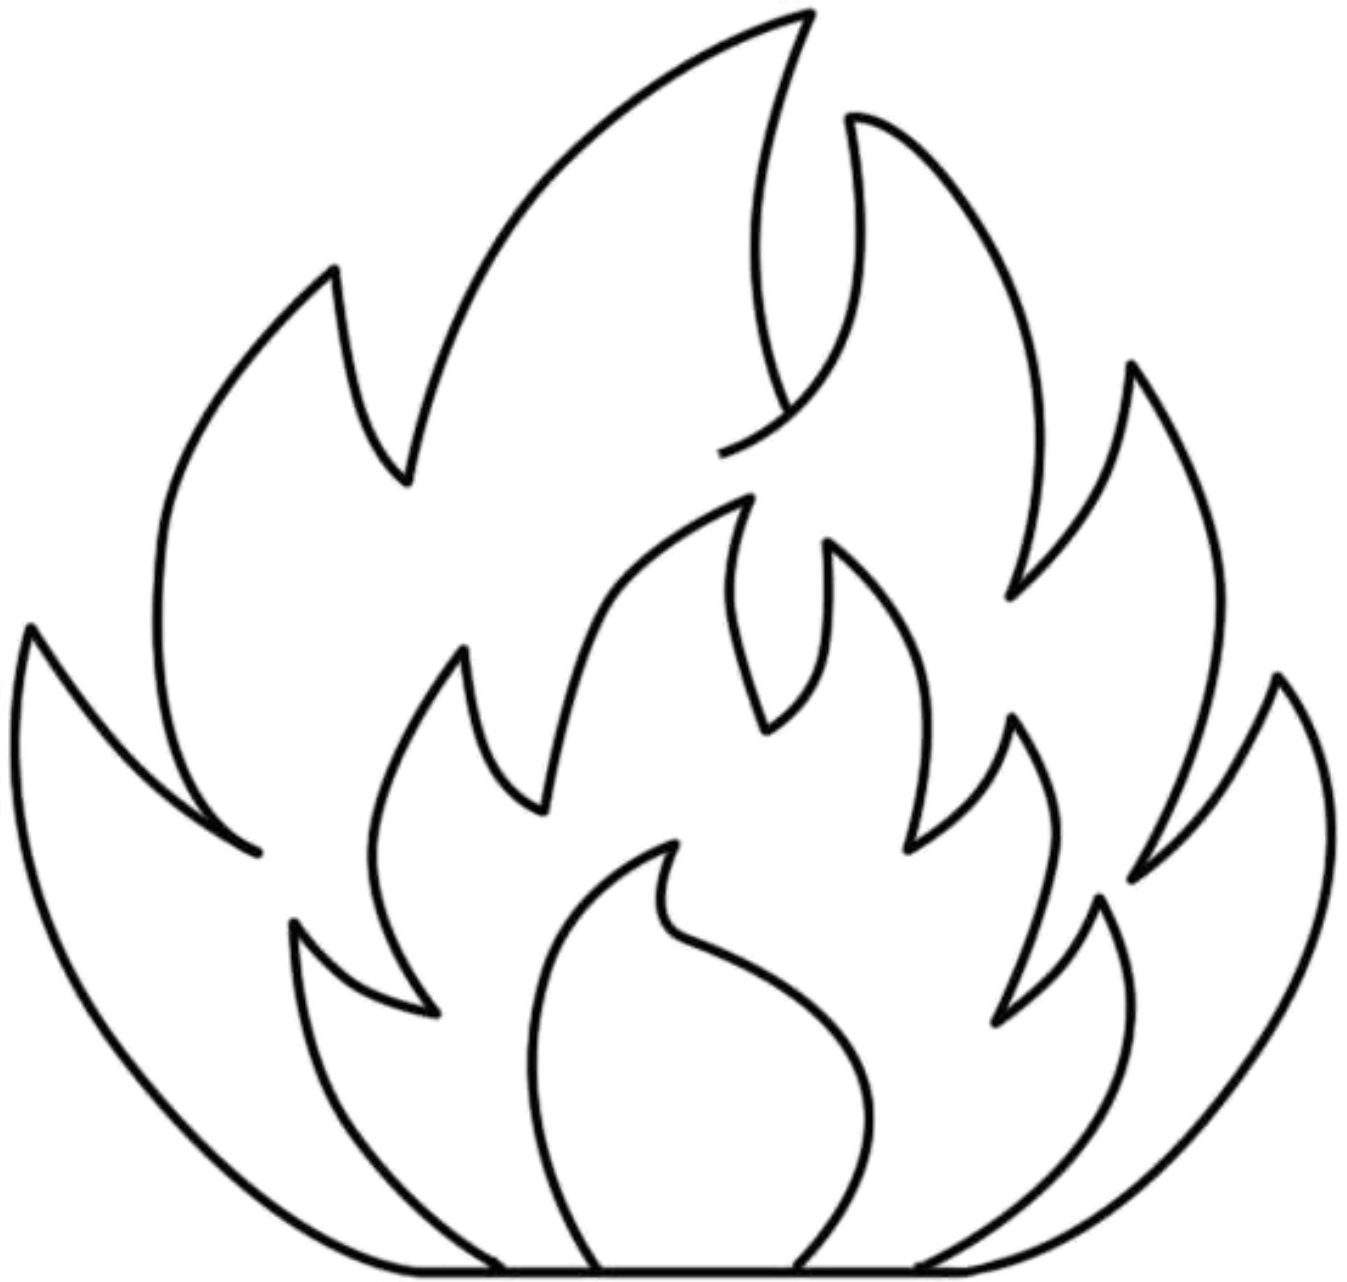

Use the Small flames to make rings, necklaces, small fires for decorations or just fun.

Two fire flame sets to cut out and create your own.

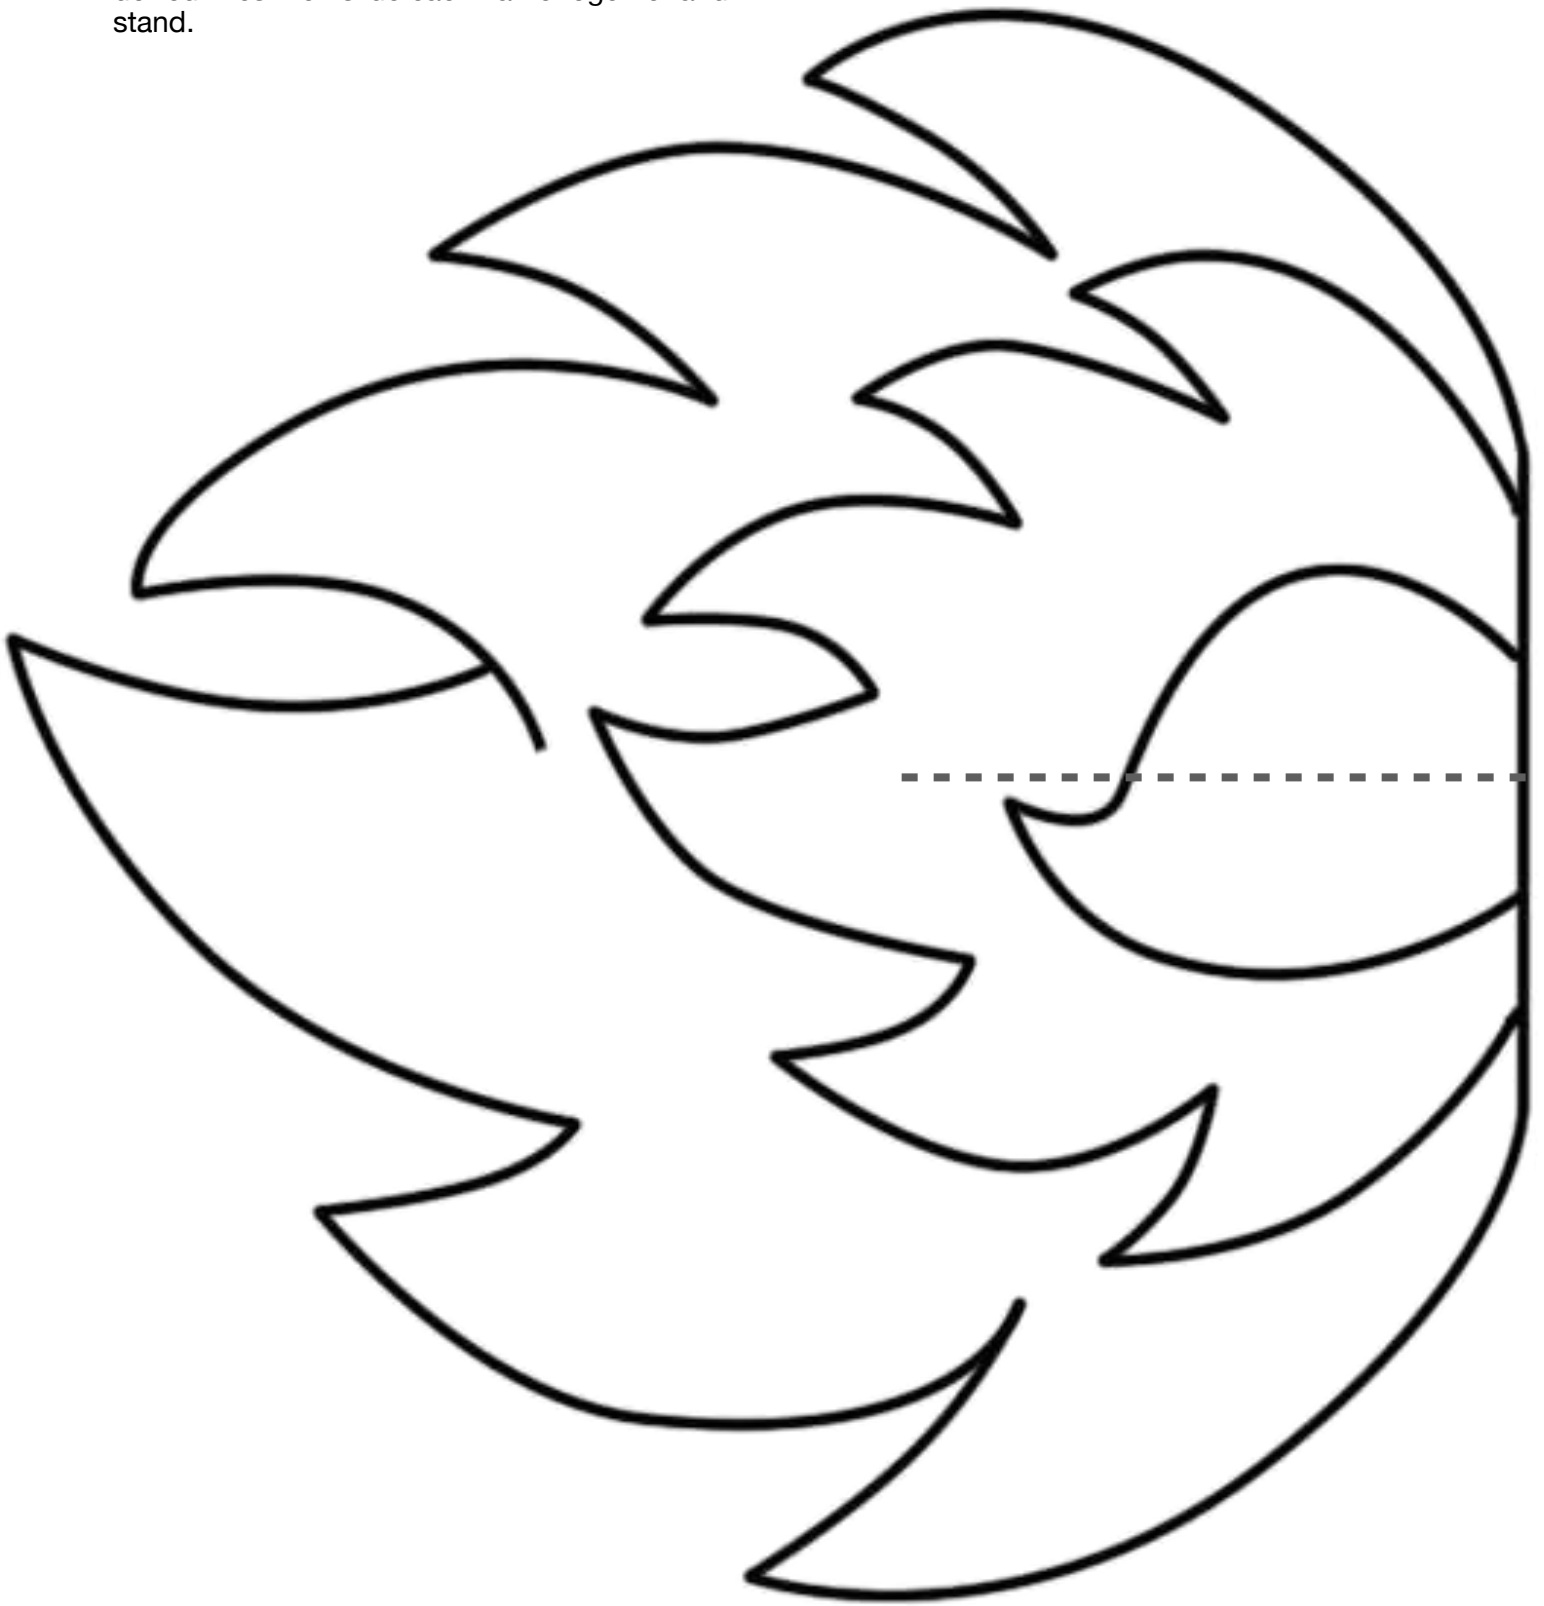

Print, color and cut.

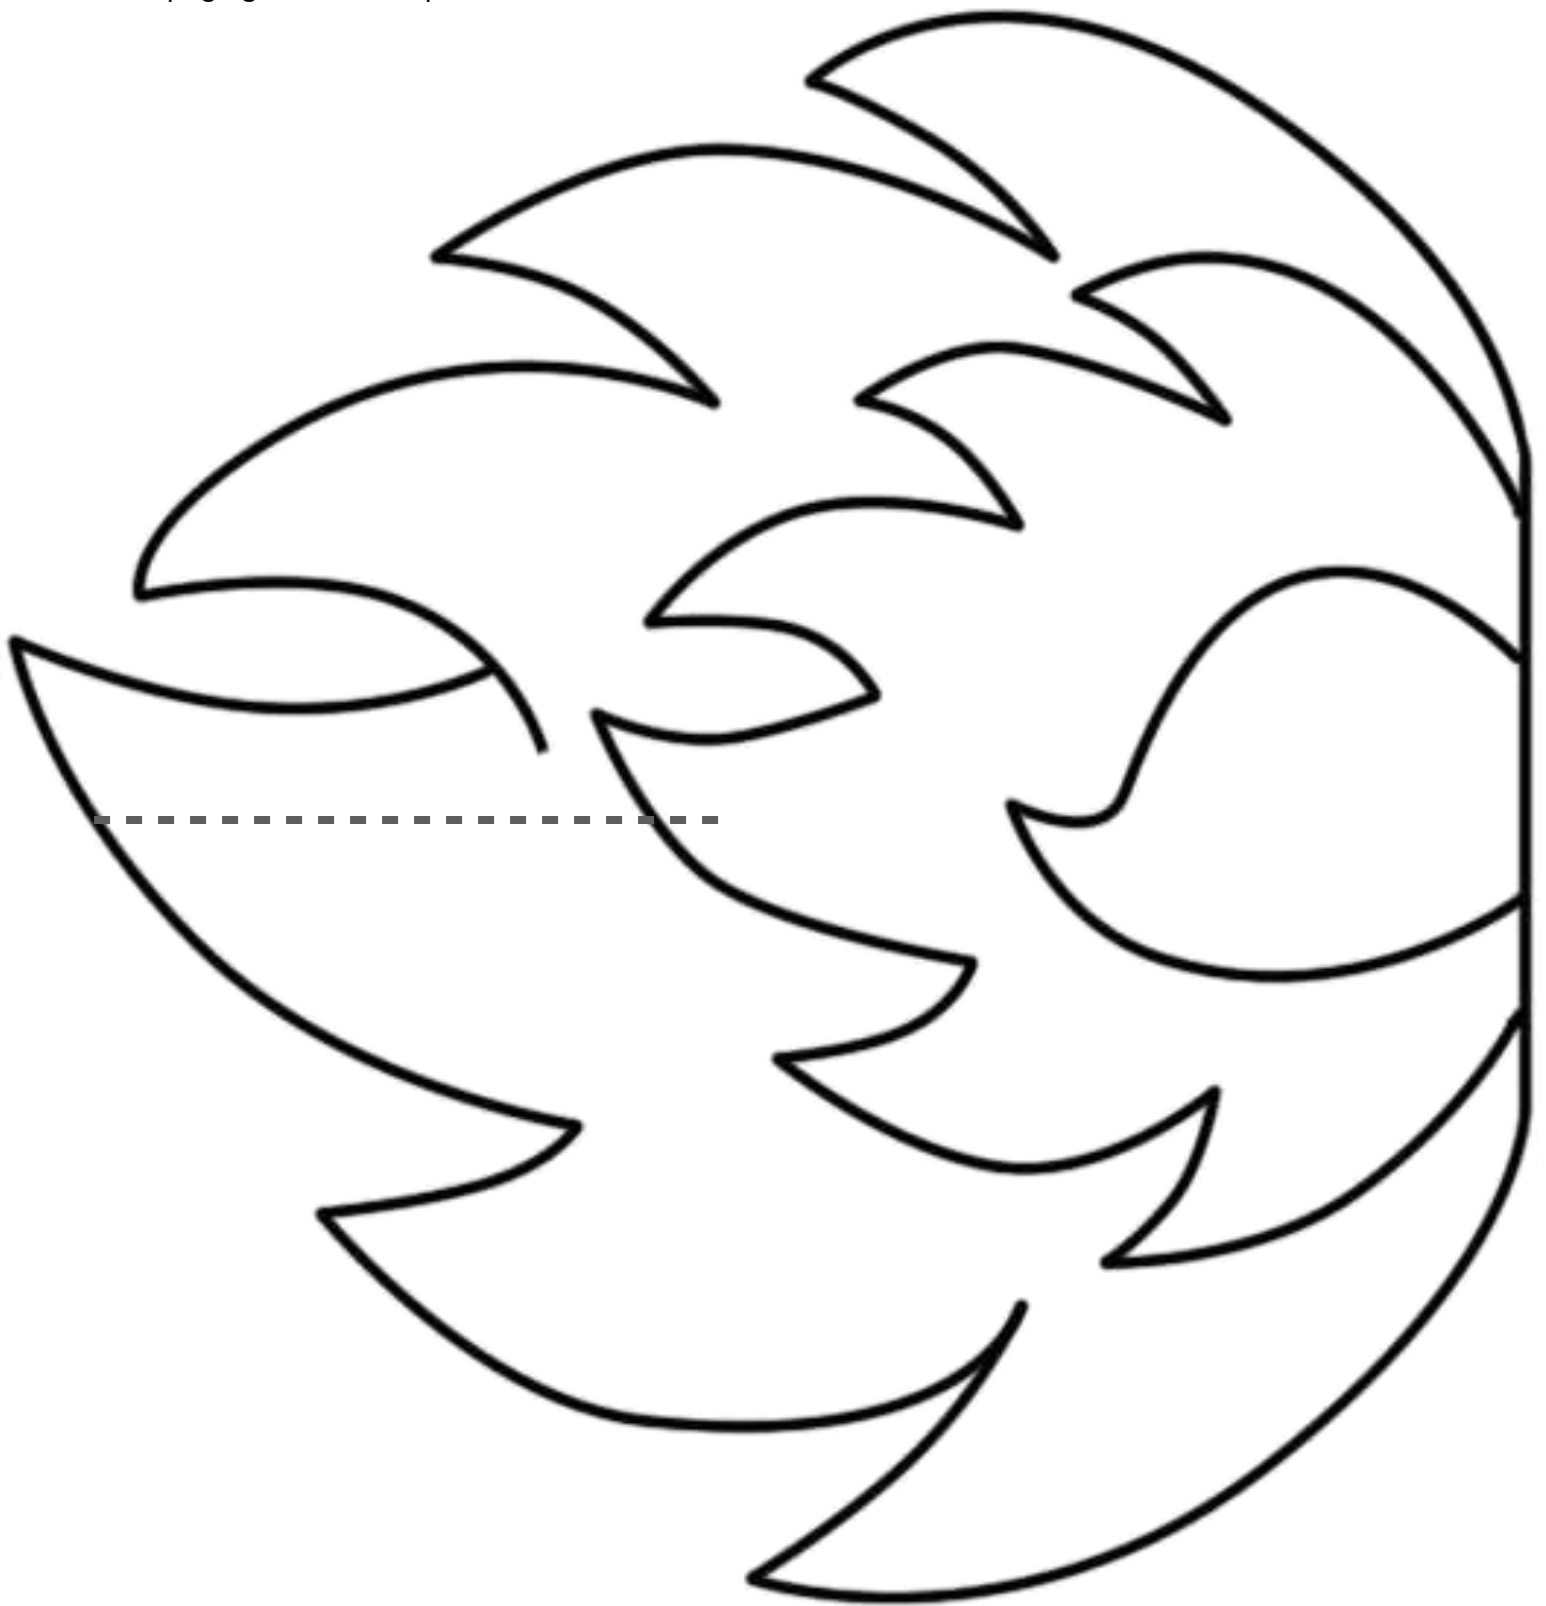

Print, color and cut.

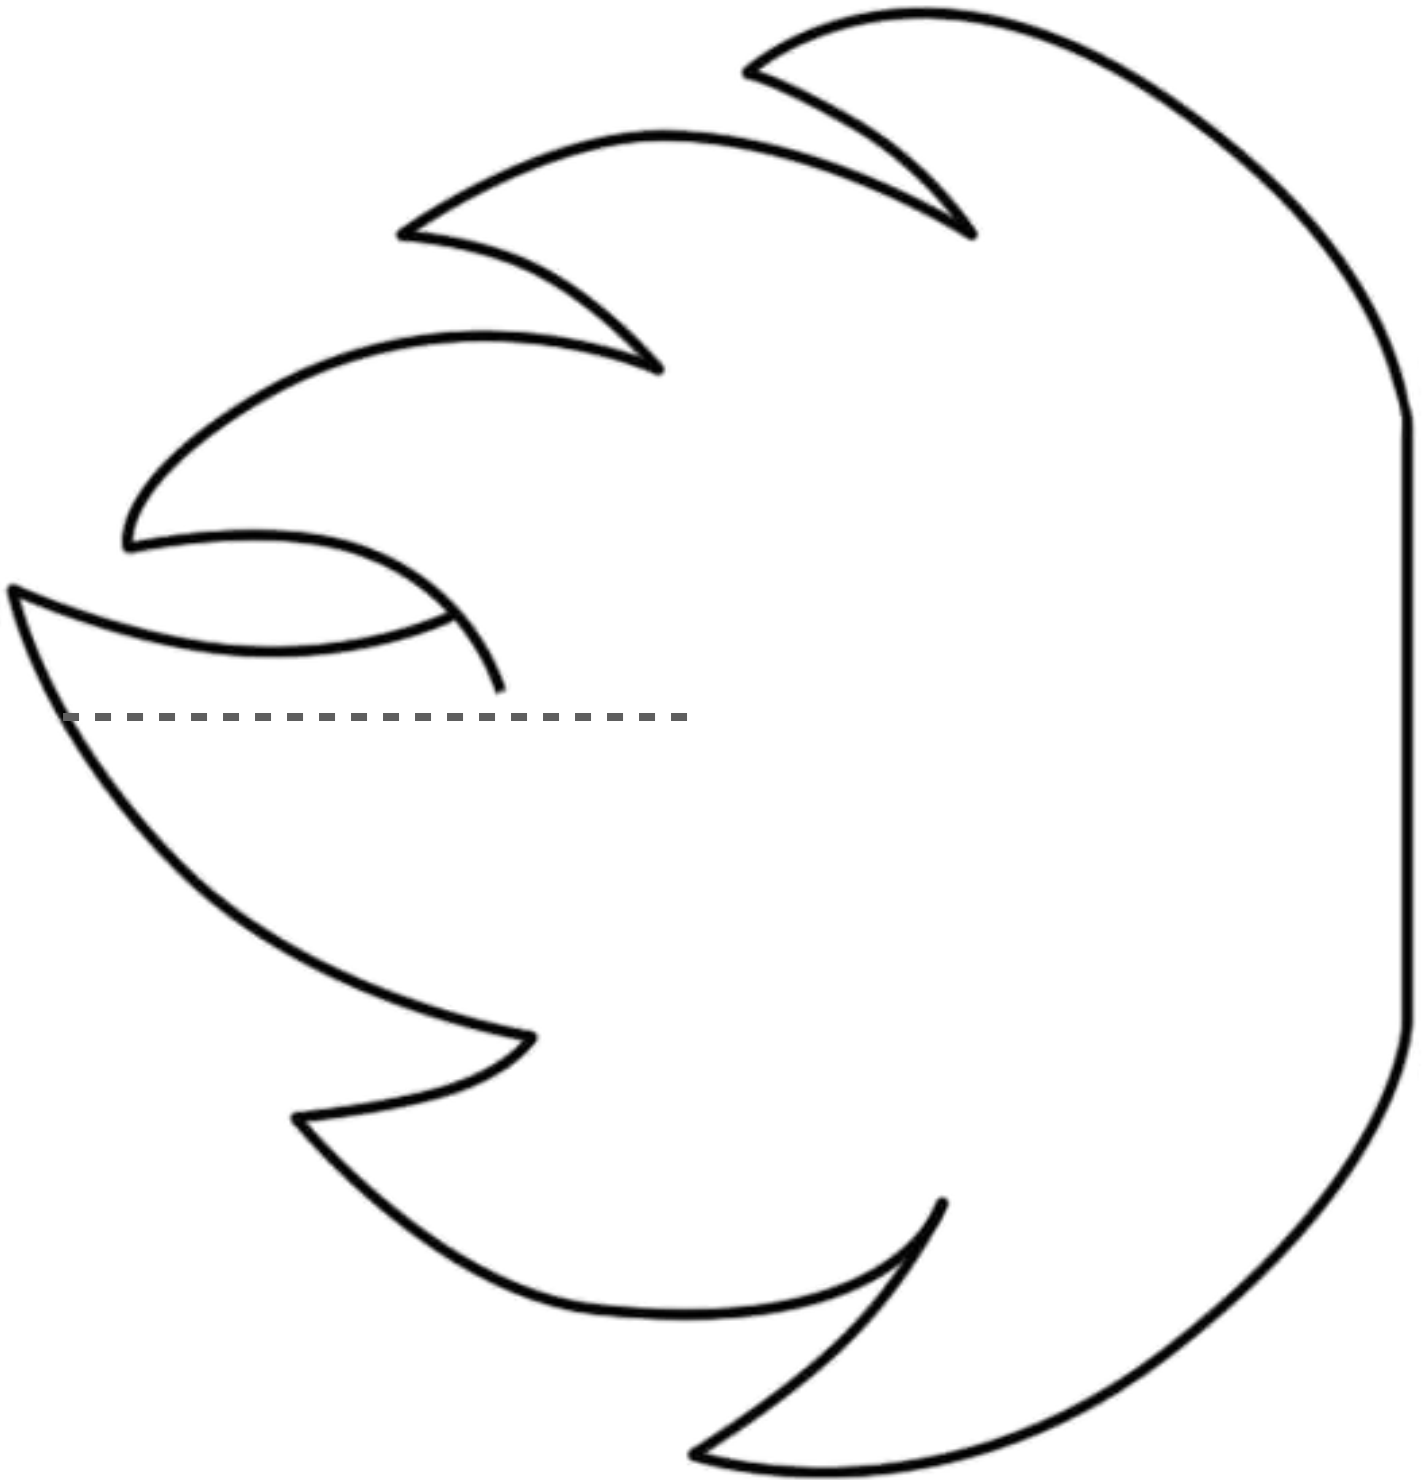

Print this page and the next on cardstock. Color and cut out each flame. To assemble cut on the dotted lines then slide each flame together and stand.

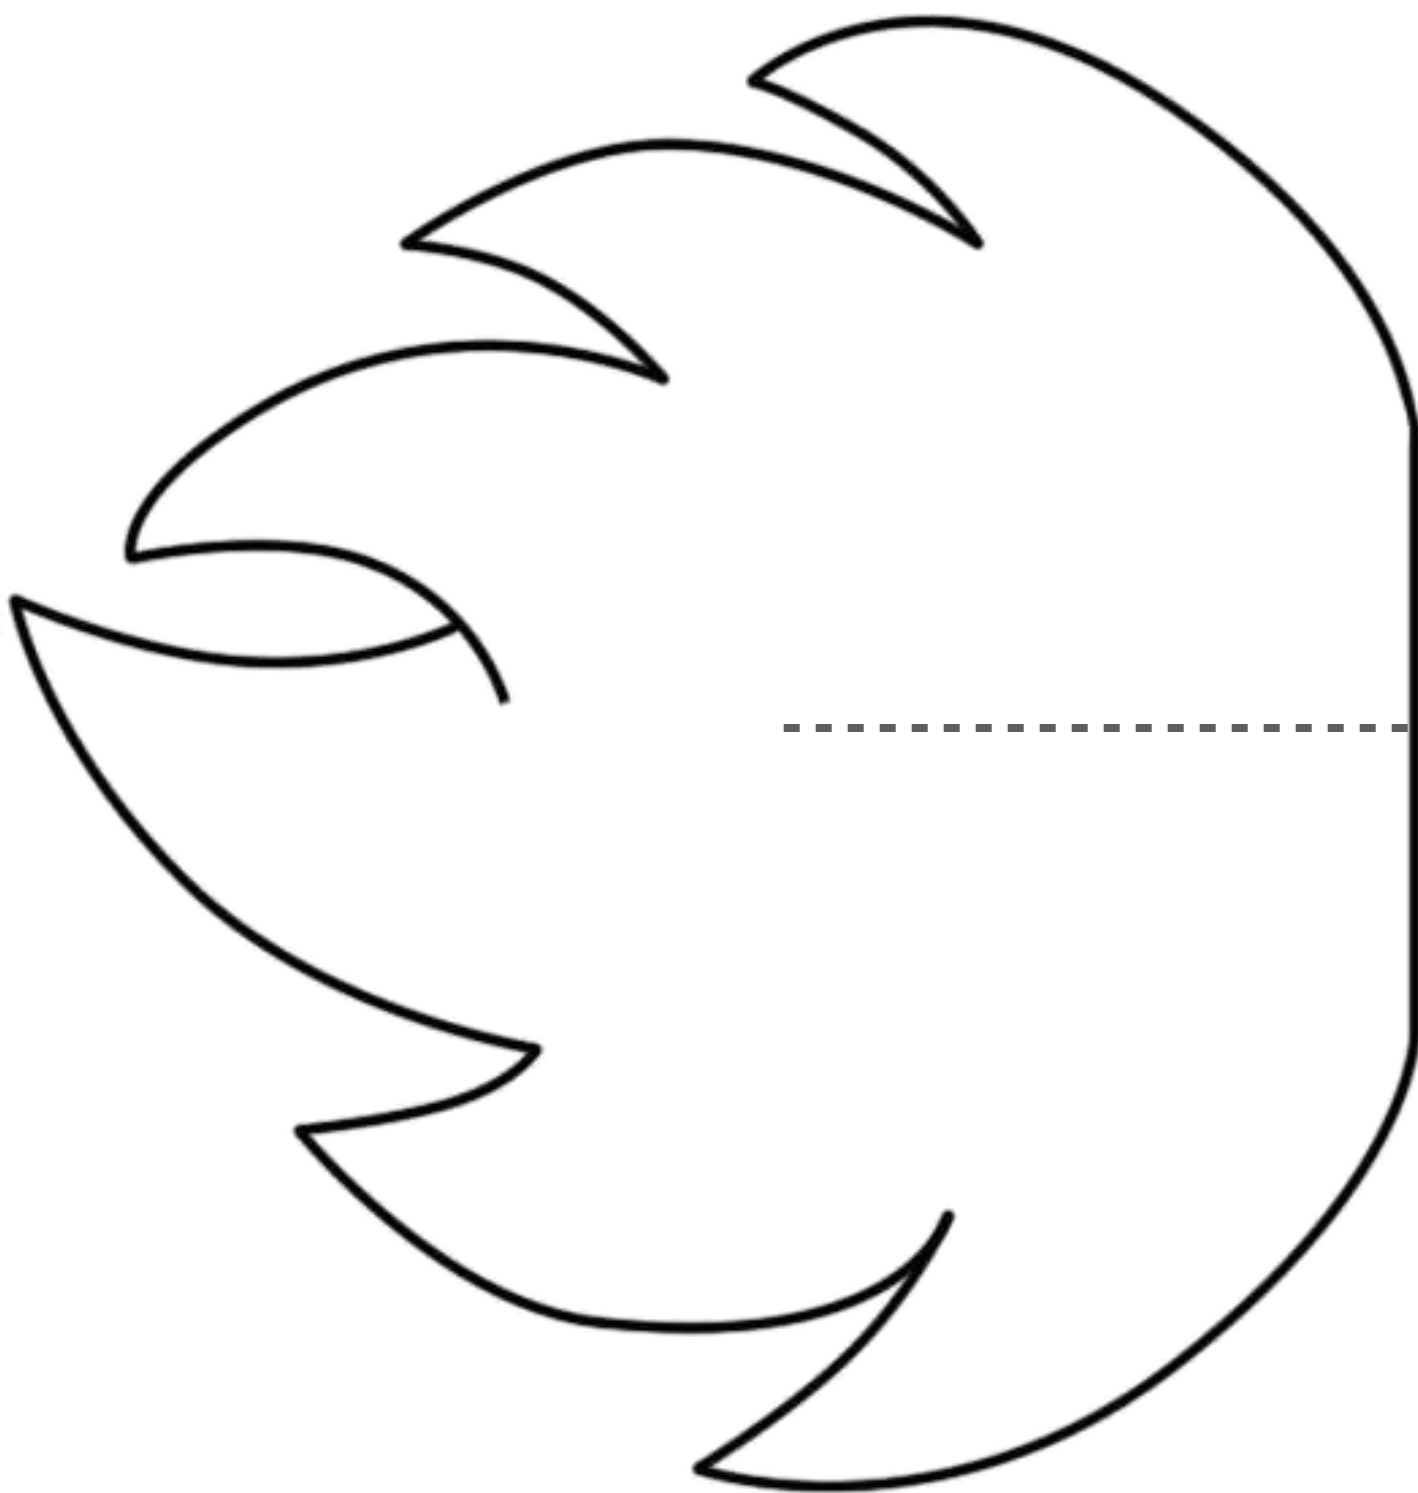

This page goes with the previous.

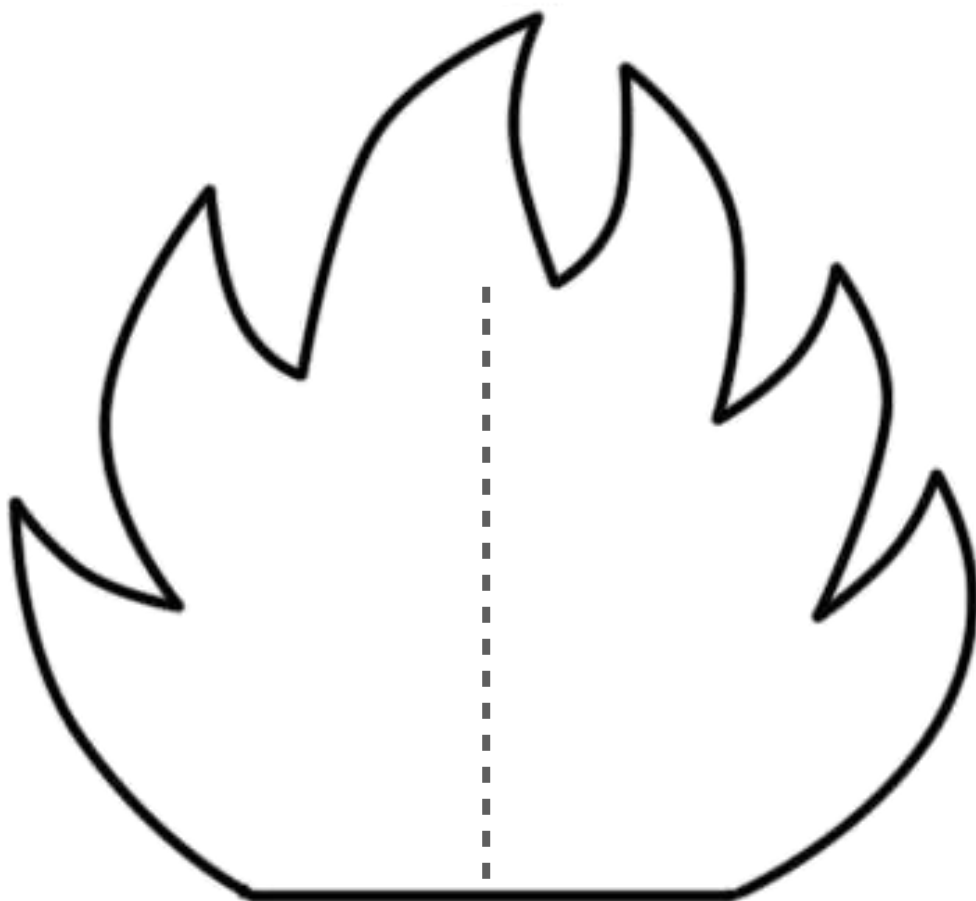

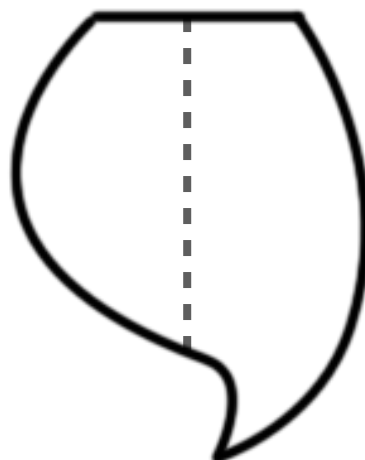

You can piece this one together to use as a template, or as an actual color page. Cut on the dotted lines or if using as a template, mark where to cut on the foam, felt, or cardboard.

This set is going to go with the cut on the bottom side piece and need to be cut through.

This set is going to go with the top cut large
lame. They do not have a dotted line through the
flame

Left Fire Flames

Template for larger fire. Print on cardstock for durability. Make 3 copies of each side and cut the large, medium, and small fire out. Trace around each and cut out of cardboard, felt or foam.

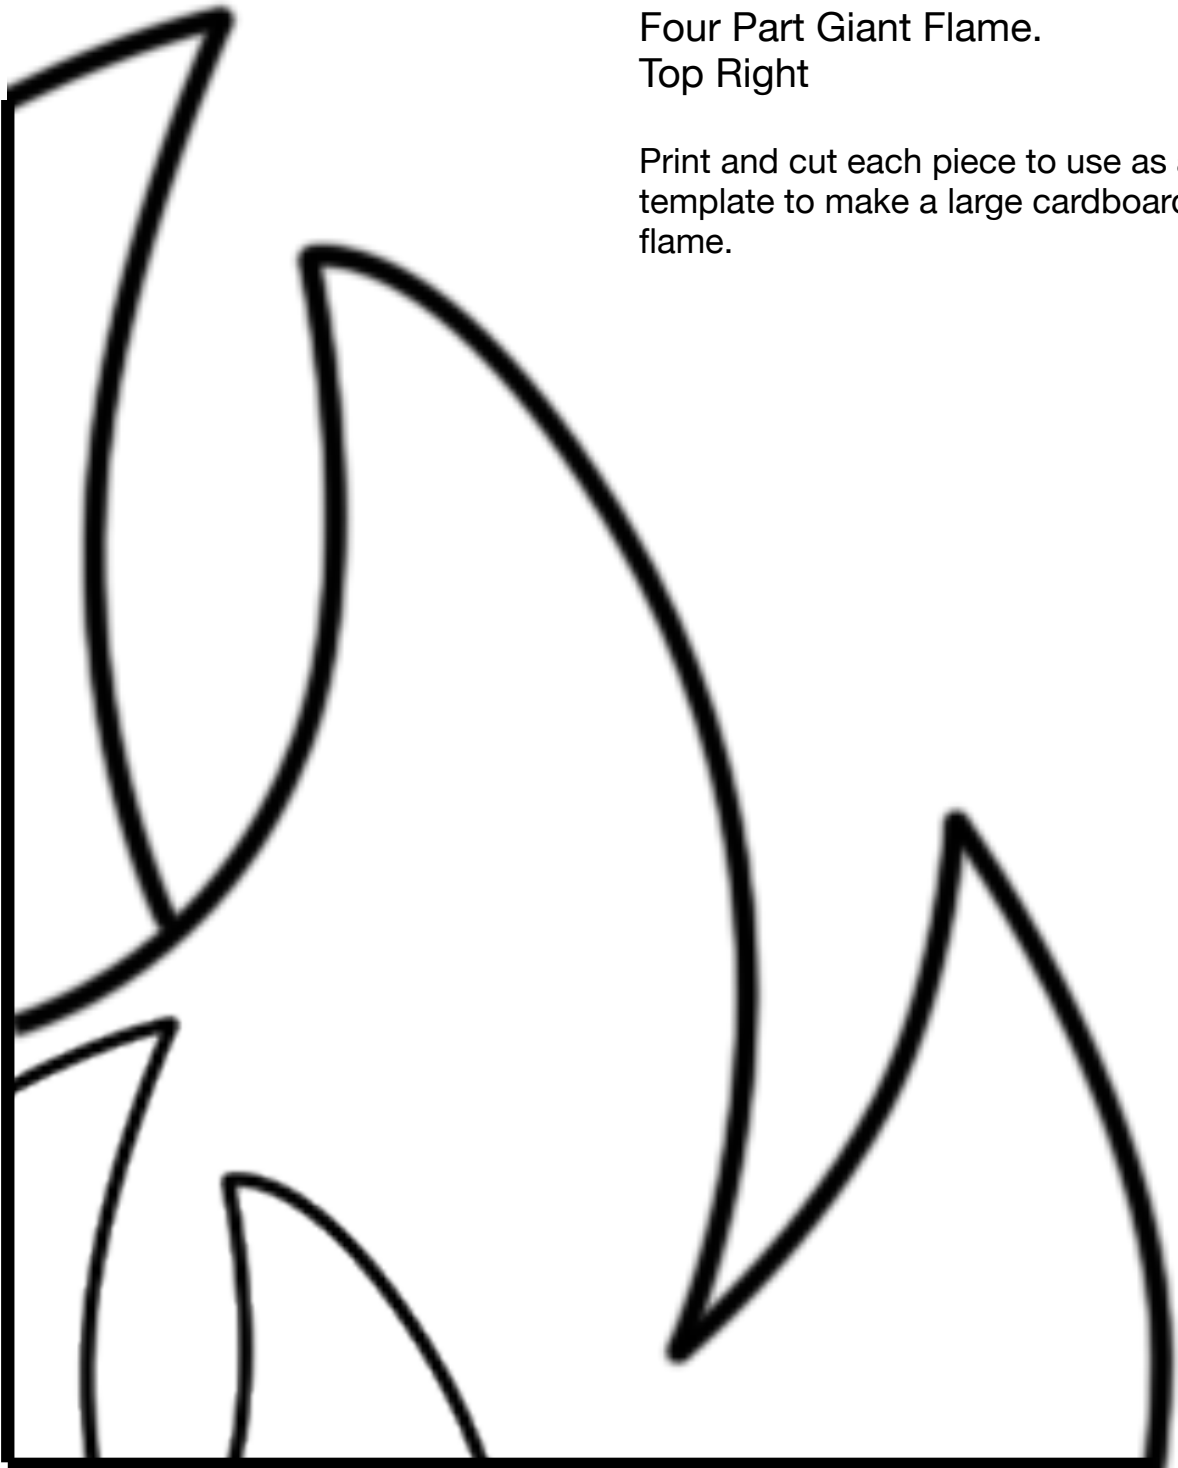

Right Fire Flame

Four Part Giant Flame.
Top Right

Print and cut each piece to use as a
template to make a large cardboard
flame.

Bottom Right

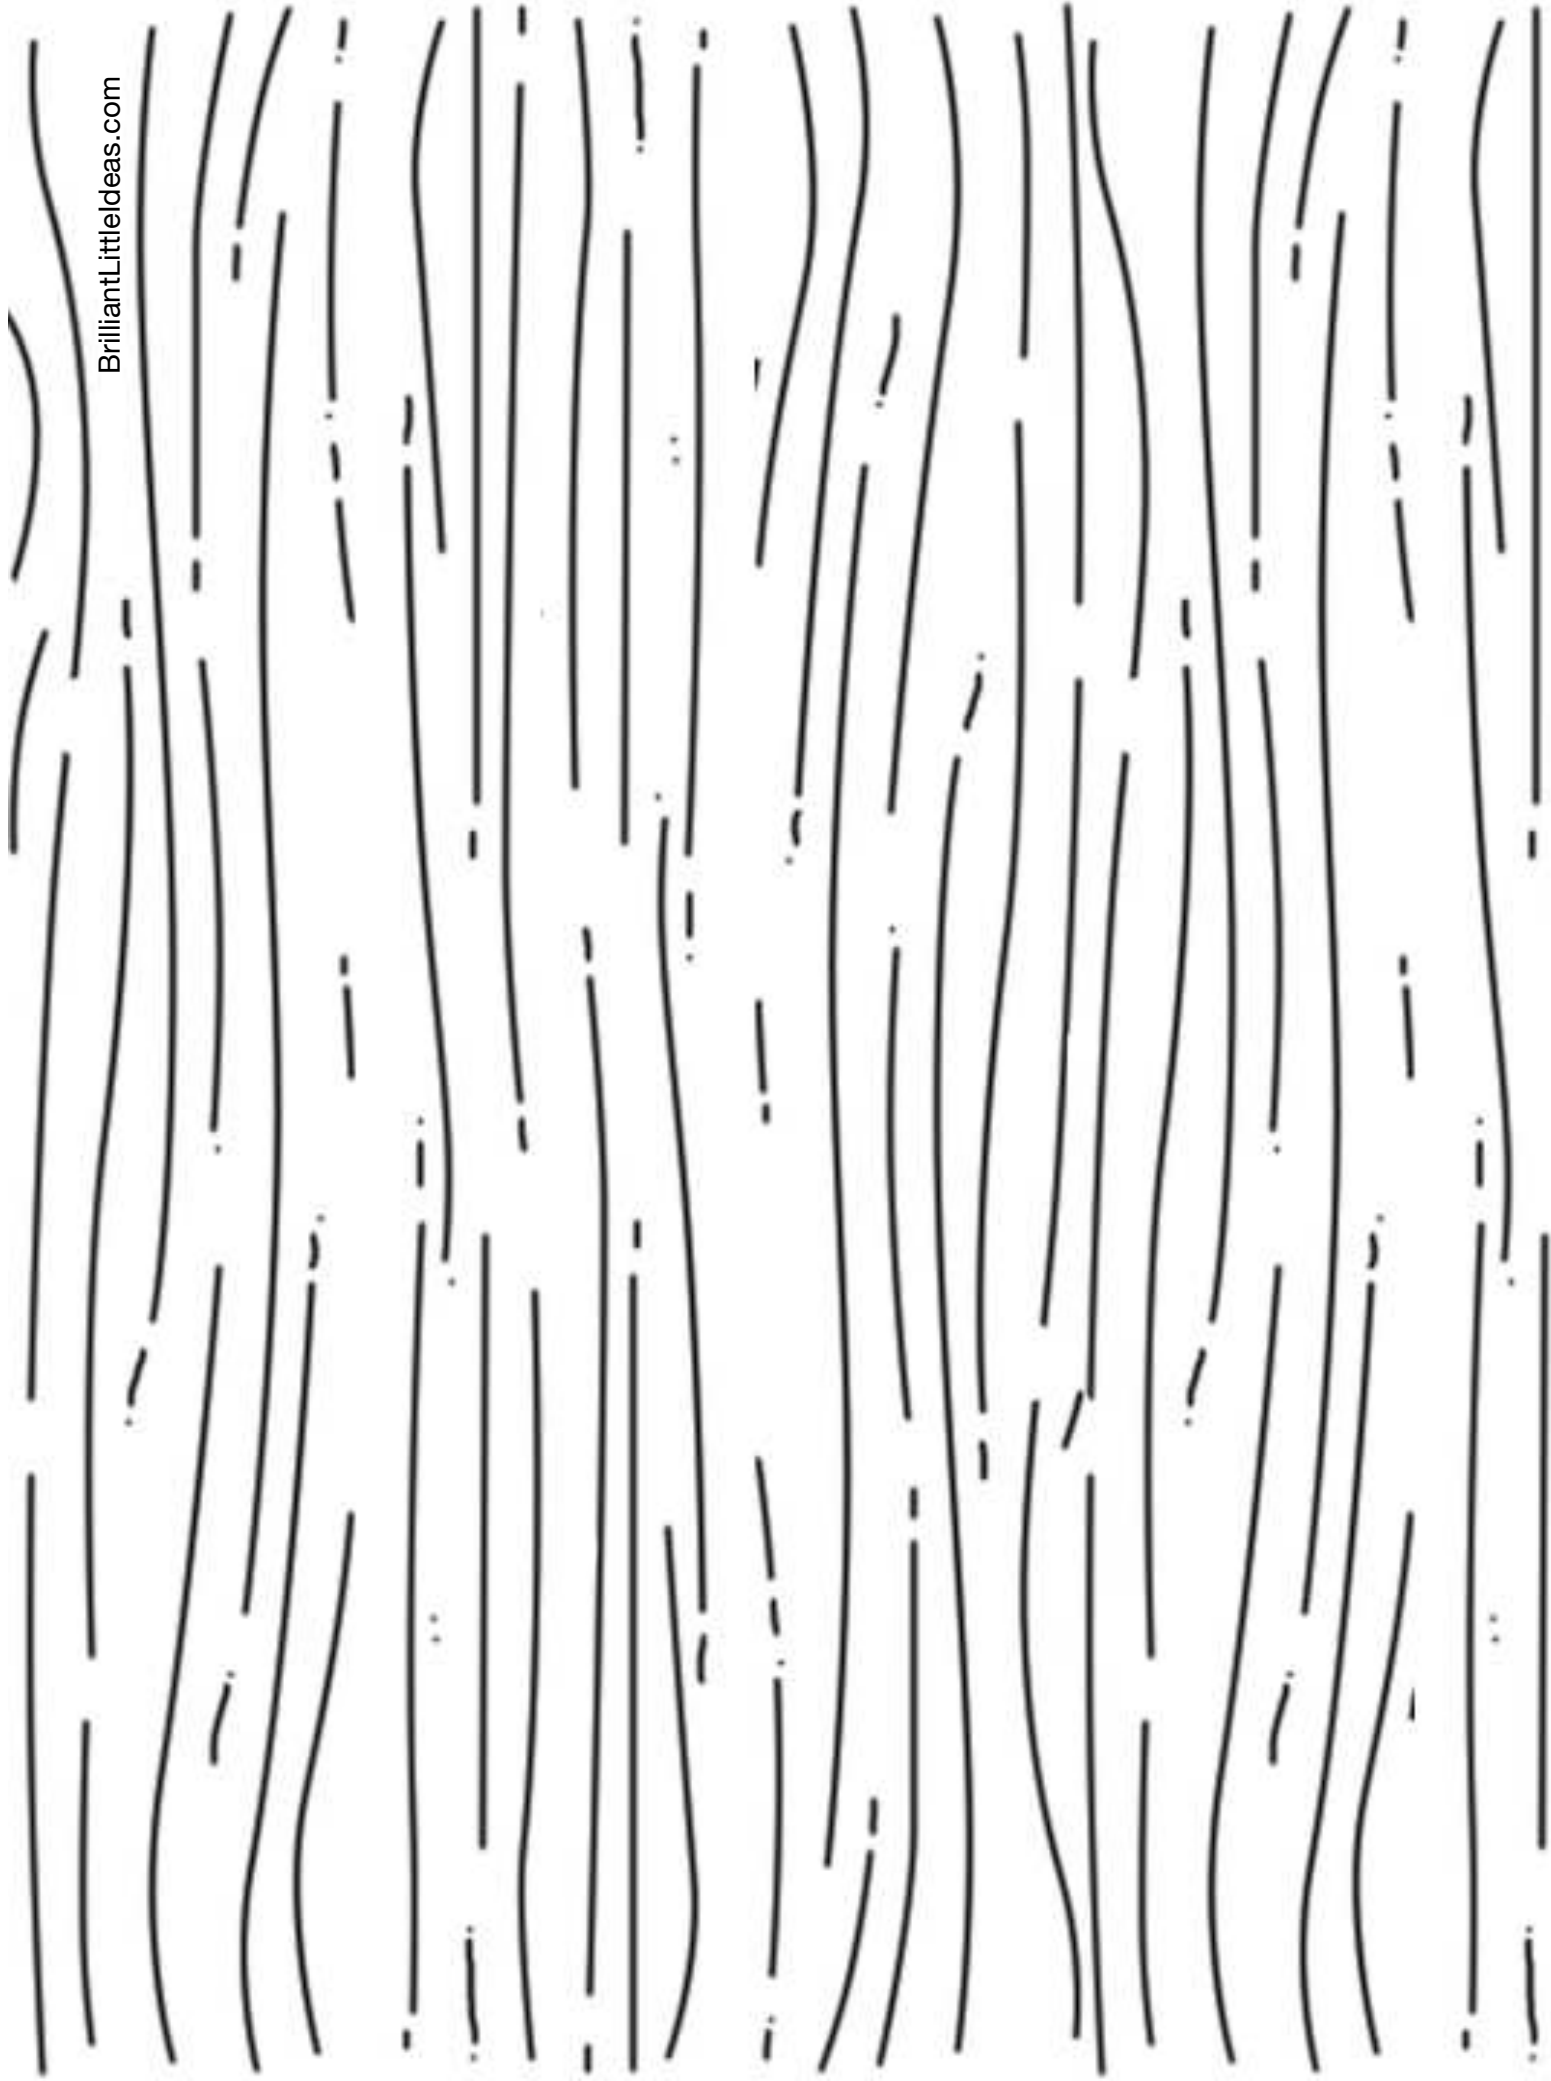

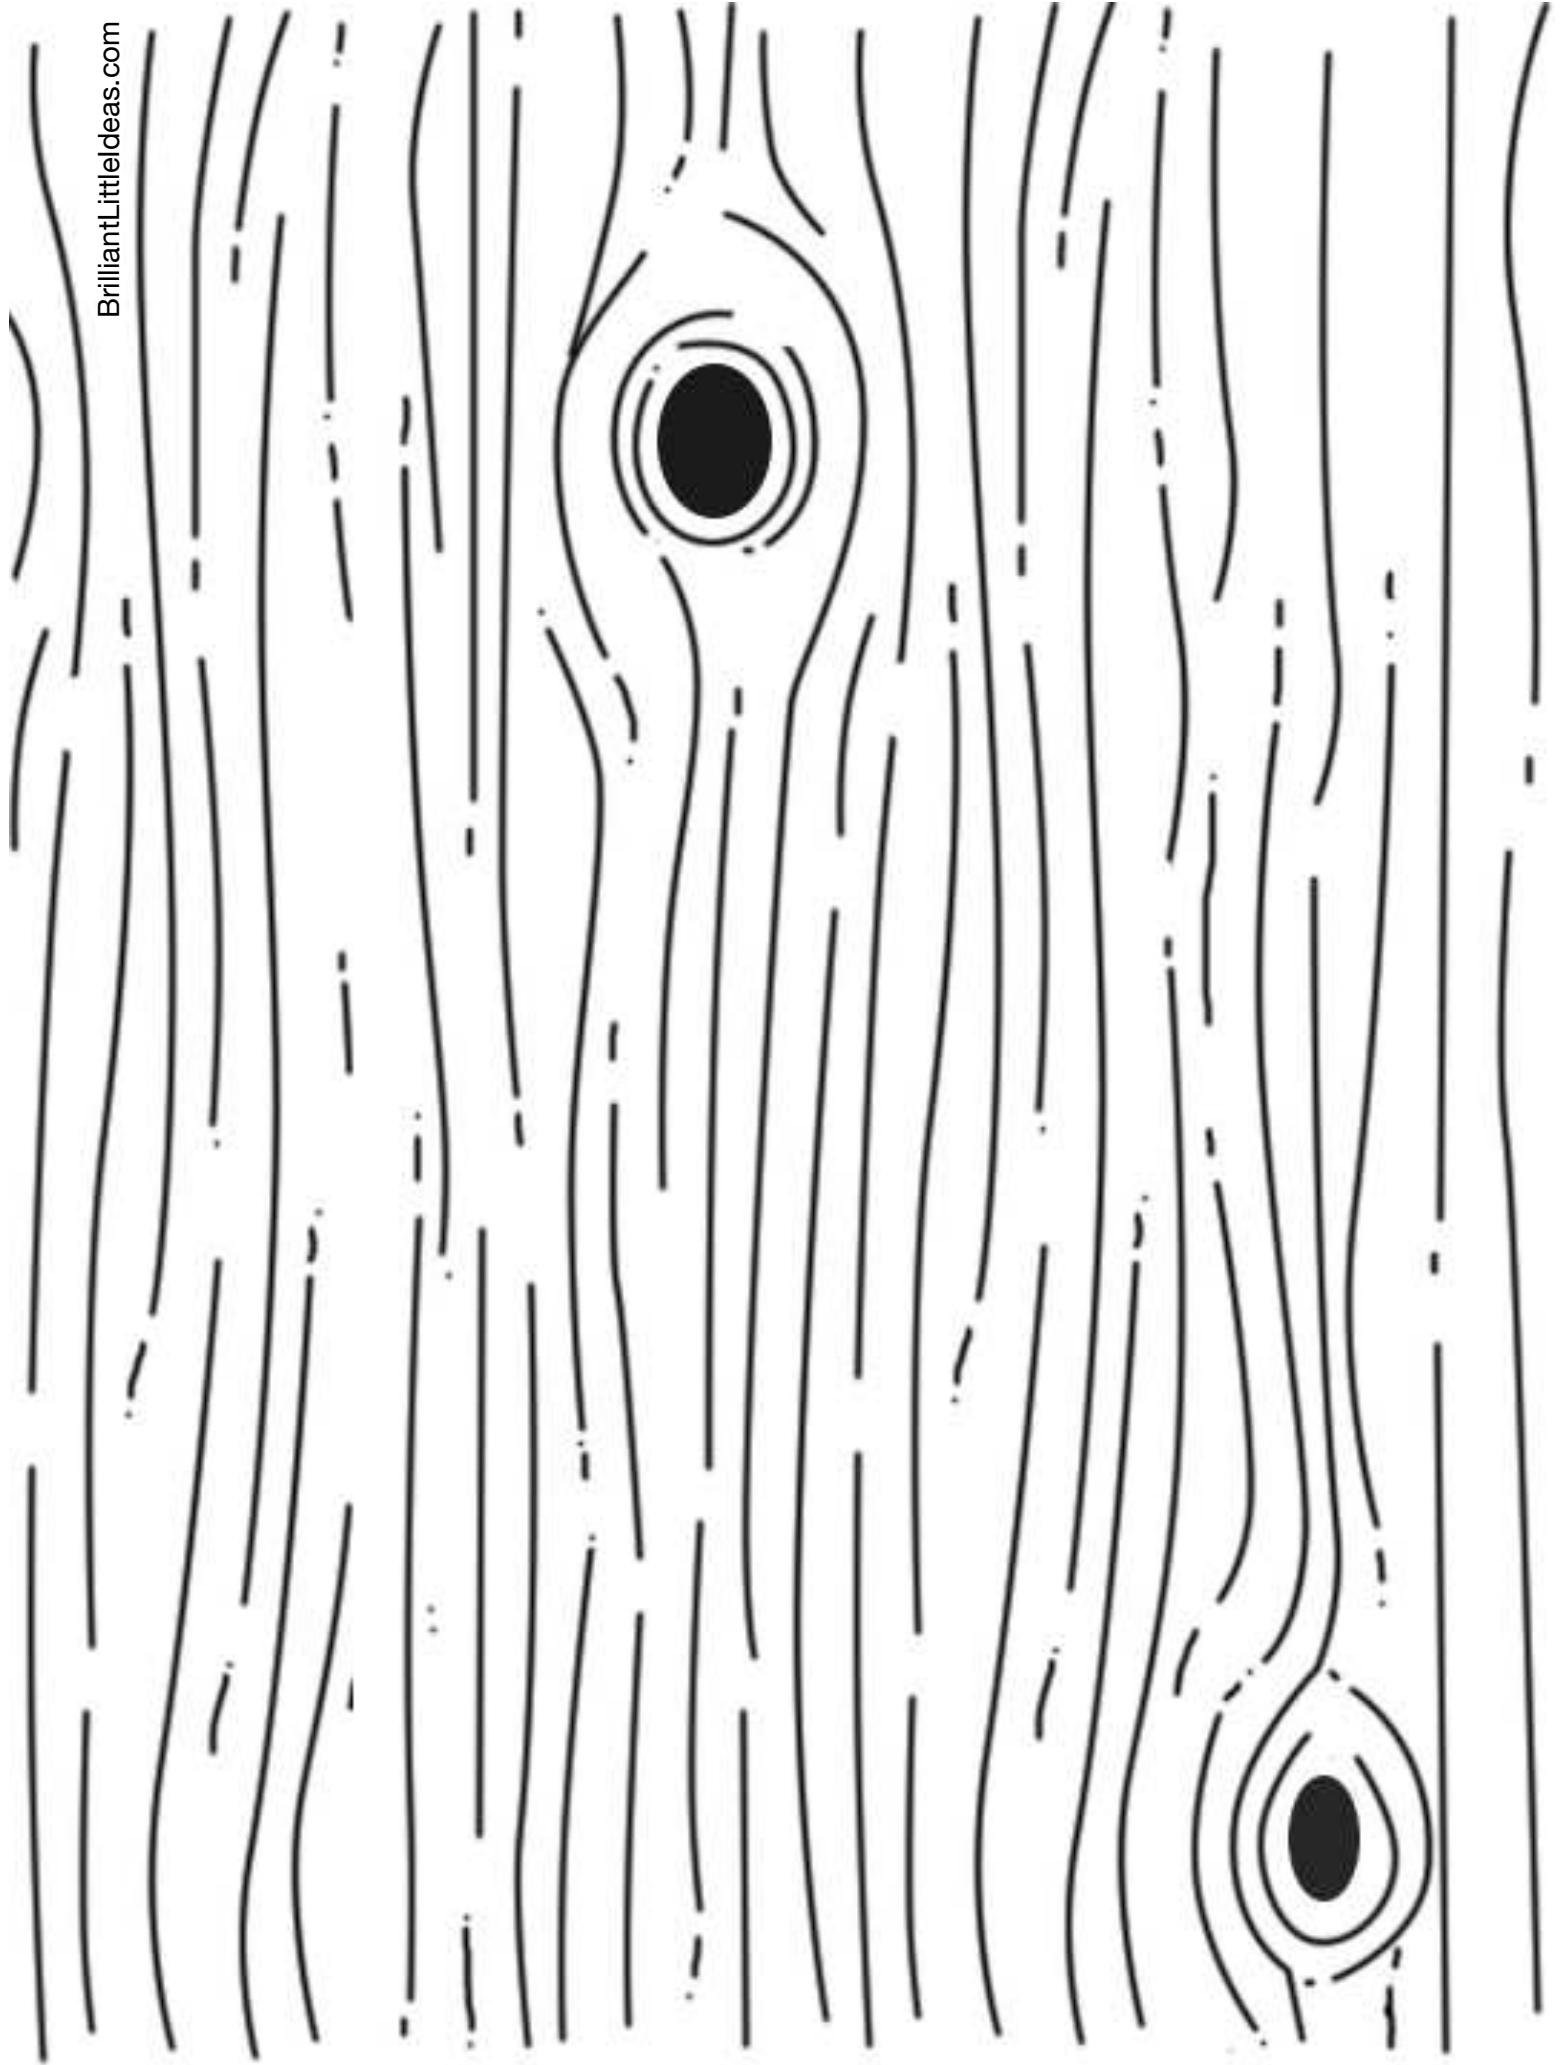

Top Left Flame

Bottom Left Flame

Small Log Ends.

When cutting it out leave a little paper around the edge of each log end to secure to the tube itself.

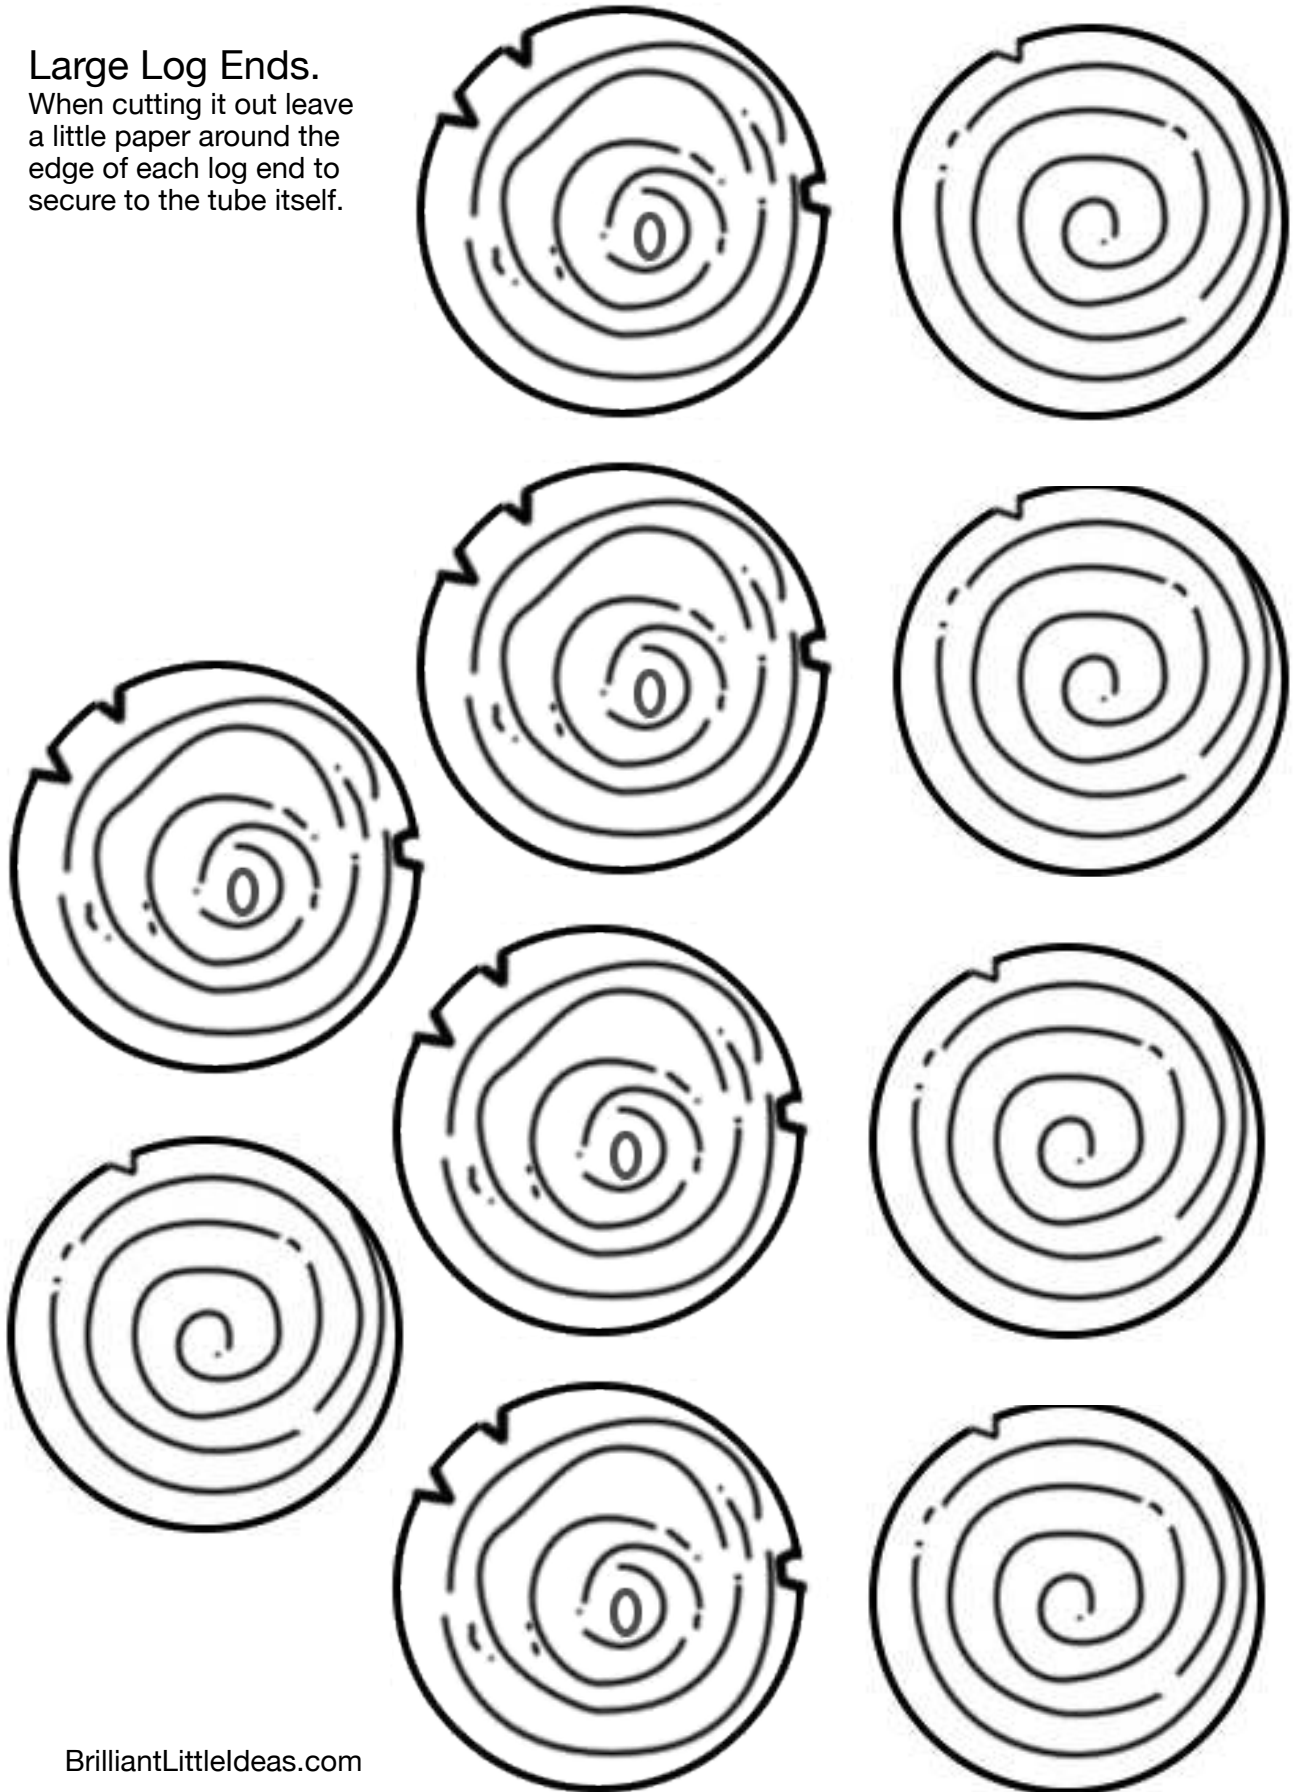

Medium Log Ends.

When cutting it out leave a little paper around the edge of each log end to secure to the tube itself.

Large Log Ends.
When cutting it out leave
a little paper around the
edge of each log end to
secure to the tube itself.

Shrinky Dink Template

Place flames template under a clear shrink dink paper. Tape the edges so the template doesn't move while tracing the lines. When you have traces out the flame lines fill in the flames with the colors of your choice.
